

## Other Projects in the Study Area

### Projects in Study Phase

#### Hampton Roads Third Crossing / Patriot's Crossing

- Initiated in late 1993 to investigate methods to improve mobility across Hampton Roads and relieve congestion at the Interstate 64 Hampton Roads Bridge Tunnel.
- Final EIS prepared in 2000 to assess the impact of building a new crossing in Hampton Roads.
- VDOT is now reevaluating the EIS. Reevaluation will include the Craney Island Connector and a new bridge tunnel that would connect I-564 and I-664 (Patriot's Crossing).

#### Interstate 64 Peninsula Study

- Extends approximately 75 miles, from I-95 in Richmond to I-664 in Hampton.
- Study will identify transportation needs within the I-64 corridor and evaluate the impacts of proposed improvements to meet those needs.
- An EIS is being prepared for the project.

### Projects in Design Phase

#### I-564 Intermodal Connector

- Will provide highway connection from I-564 to the Norfolk International Terminals and the Norfolk Naval Station, including the I-564 Air Terminal Interchange.

#### Military Highway Widening

- Will widen Military Highway from four lanes to six lanes from Broad Creek to Robin Hood Road.

### Projects in Construction

#### Hampton Blvd Grade Separation

- Removes existing at-grade conflict with the Norfolk Southern/ Norfolk Portsmouth Beltline railroad on Hampton Boulevard.

#### I-664 Monitor-Merrimac Memorial Bridge Tunnel (MMMBT)

- Waterproofing on the MMMBT bridge spans beginning in late July 2011.

#### I-64 Concrete Replacement

- Replaces temporary patches on I-64 from east of the Hampton Roads Bridge Tunnel to Greenbrier Parkway in Chesapeake.
