

- ❑ In order to view and / or print the County Road Map Series (CMS) PDF files, Adobe Reader software is needed. Adobe Reader is available for free from www.adobe.com
 - ❑ The CMS PDF files are optimized for printing. Each file represents a map that was approximately 19" x 28" in the original.
 - ❑ Viewing. Adobe Reader allows for easy panning, and zooming in and out of the map image.
 - ❑ Printing. By utilizing Adobe Reader's "Print Setup" and "Print" commands, one can manipulate the actual printed size of the map. Since the PDF file is based on vector information, the size can be manipulated so it is smaller or larger than the actual 19" x 28" file without much loss of legibility. However, attempting to print the map on an 8½" x 11" piece of paper is done at your own risk.
 - ❑ If you find an error of any kind on any of the County Road Maps, please notify the Cartography Section immediately. Please include the map sheet number, your contact information, the route number and nearest intersection route number, and a detailed description of the problem. It is important to provide as much information as possible in describing the error.
- Please forward this information to the Cartography Section by email at vdotmapfiles@vdot.virginia.gov. We may contact you for further information and will let you know how your error report was handled.
